

Take all you want but eat all you take

As part of our activities towards integrating sustainable congress practices, this year we will collaborate with [REFOOD](#) and fight against food waste.

The [REFOOD](#) mission is to rescue food, feed people, and include the entire local community, co-creating a more just, caring, and sustainable society.

The movement rescues tons of good food to stop waste and feed people in need, by building a human bridge between excess and necessity.
